

ONGOING AI LEADERSHIP AND GOVERNANCE

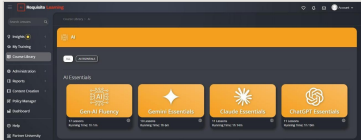

Requisite Cadence

See how your people use AI. Steer it. Keep them learning.

Your people are already using AI, often without you knowing. Cadence shows you how it is being used, keeps it within the rules you set, trains your people, and gives your leadership team a senior AI adviser who stays involved.

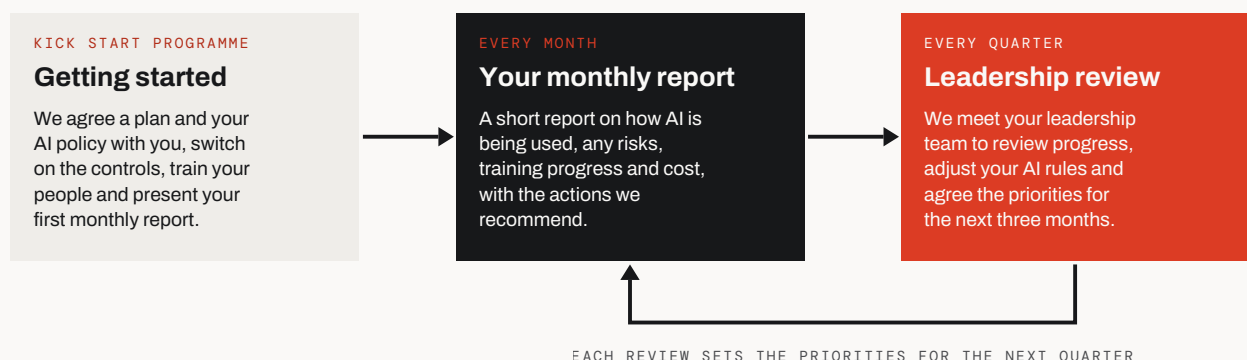

Monthly AI REPORT FOR YOUR LEADERSHIP TEAM	Quarterly REVIEW OF PROGRESS AND PRIORITIES	Kick Start PROGRAMME TO GET YOU STARTED	Every user COVERED BY THE CONTROLS AND TRAINING
--	---	---	---

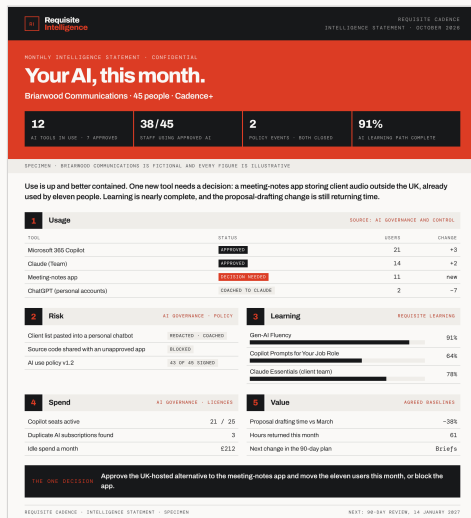

WHAT YOU GET

LEADERSHIP · REQUISITE AI Leadership - A senior adviser who acts as your virtual head of AI, while your leaders keep the decisions - A monthly report on how AI is used, the risks, training, costs and benefits, with clear recommendations - A quarterly review with your leaders to check progress and set priorities - An AI policy written with you, kept up to date and built into the controls - Help for your leaders to explain AI to their people and to choose new tools wisely	AI GOVERNANCE AND CONTROL See and steer AI use - Which AI tools your people use, in which teams and with what kind of information, including tools nobody approved - Rules in plain English that apply as people work: a prompt to think again, sensitive details removed, or the action stopped  AI GOVERNANCE AND CONTROL · AI USE BY TEAM AND TOOL	LEARNING · REQUISITE LEARNING Keep people learning - Short online courses on Copilot, ChatGPT, Claude and Gemini, matched to each role - Your AI policy signed by every member of staff, with a few questions to check it is understood  REQUISITE LEARNING · AI COURSE LIBRARY

HOW IT RUNS

ALL THE TIME: THE CONTROLS GUIDE PEOPLE OR STOP RISKY AI USE AS IT HAPPENS, AND TRAINING CONTINUES

SPECIMEN INTELLIGENCE STATEMENT -
FICTIONAL CLIENT, ILLUSTRATIVE FIGURES

A clear monthly report on your AI

Each month your leaders receive the Intelligence Statement, a short report they can read in five minutes. It shows which AI tools are in use and by whom, anything that went against your policy, who has completed their training, what you pay for but do not use, and the benefits AI is delivering. It ends with the one decision we need from you and the three actions we recommend.

Built in from day one

- **Privacy first.** We keep a high-level record of AI use, and the full detail only when someone breaks a rule. Everything is processed in the EU. Your staff are told what is checked and why, and we prepare the data protection impact assessment for you.
- **Works alongside Microsoft 365.** Your Microsoft 365 permissions govern what Copilot can reach; we govern how people use Copilot and every other AI tool.
- **Guidance before blocking.** People get a helpful prompt in the moment. Blocking is kept for the things your leaders decide are off limits.
- **Works with your IT provider.** We work with your own IT team or IT partner to deploy the platforms, and can bring in specialists where needed.
